Francisco Mónaco, 38
an Italian born in Venezuela
located in Valencia, Spain

ux / ui, web and graphic designer.
15+ year experience front-end developer.
seasoned photographer and art director.

My journey into design and development began in 2005 while I was pursuing a graphic design degree at the Caracas Design Institute (IDC). By the time I graduated in 2008, I had already built a solid client base, which naturally led me into the freelancing world. This passion-turned-profession kept me fully engaged until 2015, when I decided to broaden my horizons by relocating to Valencia, Spain, where I continued to thrive as a registered freelancer.

In 2016, I embarked on a new chapter with Brandsummit, joining as a web designer and developer. I balanced this role with my freelance activities until 2020, when I transitioned to a full-time position as a senior UX/UI designer and front-end developer. Since then, I have led over 30 projects, delivering innovative solutions to clients around the globe. My diverse experiences and relentless drive for excellence have shaped me into a versatile and highly skilled professional in the design and development industry.
